Product Features

DURABLE

STAINLESS STEEL CONSTRUCTION

Both the interior and exterior of the oven are crafted from stainless steel, ensuring robust functionality and longevity.

The oven's design combines compact size with high output, all while maintaining low energy consumption.

HIGH-QUALITY MATERIALS

The outer shell is constructed from 1.2mm thick 201 stainless steel, while the inner cavity features a 1.5mm thick 201 mirror panel stainless steel. This combination offers both durability and a sleek, reflective interior for optimal performance.

EFFICIENT HOT AIR CONVECTION

Equipped with rotary heating fan hot air circulation system, the oven ensures full convection of hot air and uniform heat distribution throughout the chamber.

Additionally, the oven is fitted with internal lights for better visibility.

PRECISE AUTOMATIC CONTROLS

The oven features an automatic temperature control system. It includes double timers that separately manage the baking time and steam spray duration, providing precise control over the baking process

AUTOMATIC MOTOR REVERSAL

The motor is designed to reverse direction automatically at set intervals.

This function ensures even baking and consistent results across all batches.
