

Corrugated metal roofing panels

Corrugated metal roofing panels are made from galvanized steel or aluminum. They are available in a variety of colors and finishes. The panels are made from a single sheet of metal that is rolled into a series of ridges and valleys. This design makes them easy to install and they are highly durable. They are also fire-resistant and can last for many years. For more information, please visit www.Tsingbuy.com.

With a few specifications we can manufacture your customized product

- A. Overall Length
- B. Overall Width
- C. Height
- D. Row Width
- F. Width of edge
