Caring of Teflon coated

Basic Maintenance (first time use only) :

- 1. Clean the trays(make sure not use sharp tool, or it will damage the teflon coating)
- 2. Brush oil with the tray (in teflon coating area)
- 3. Set the oven on 180degrees
- 4. Put the trays inside oven , and keep in the oven at 180degrees for 10minutes

Other maintenance suggestions :

1. Baking temperature need lower 250 degree and then can expand the life span.
2. To avoid unevenly heats .
3. Don't empty to burn.
4. Don't use high temperature steam cooking for a long time as it is easy to make the teflon took off.

Instructions of teflon daily using

- 1. Cleaning with soft cloth and drying the tray before your using.
- 2. Using soft cloth or plastic scraper to clean the residues of the inner trays after finish baking.
- 3. Better to add some Neutral Detergent into temperature water to clean the residues entirely with soft cloth after using several times.
- 4. Brush some oil to improve the efficiency of coating while baking high sugar products (recommend butter, baking tray's oil or lard oil. Don't use salad oil)
