

Factory Customized Aluminum Sheet Pan Baking Tray

Main Features of Factory Customized Aluminum Sheet Pan Baking Tray

1. Because of its good thermal conductivity, there is no doubt that aluminium is the mainstream material in baking dies. The aluminium baking tray is processed by anodizing, the surface is more firm and durable, and the surface is locked. The aluminium element will not precipitate, so it is healthy and safe.
2. The baking tray made of aluminium material has the advantages of light weight, easy access, good thermal conductivity and saving baking time.
3. Integrated forming, machine stamping, no welding points.
4. Appropriate thickness, high strength, strong bearing, durable, surface anodizing treatment, easy demoulding.
5. Exquisite workmanship, beautiful arc shape of rounded corners, anti-cutting and edge-rolling design, safer, not scraping hands.
6. The use of reverse flattening technology on the four sides can effectively prevent the depression and deformation caused by impact.
7. A large number of sizes are available, and there is always one that meets your needs. Customized sheet pan is also welcomed in Tsingbuy [aluminum baking tray producer](#).

Model	Size	Height	Thickness	Model	Size	Height	Thickness
TSPP085	24*33cm	27cm	1.0mm	TSPP109	40*60cm	20mm	2.0mm
TSPP086	33*39cm	27cm	1.0mm	TSPP110	40*60cm	20mm	2.5mm
TSPP087	46*33cm	20mm	1.5mm	TSPP102	46*66cm	25mm	0.8mm

Notes when using aluminum sheet pan baking tray

Here some notes from Tsingbuy [sheet baking tray manufacturer](#) .for your information:

Before use, the interior should be cleaned and then wiped with a soft cloth.

After each use, please use a soft plastic scraper or a soft cloth to clean the appliances, and clean them, then dry them with a soft cloth, and keep them in a cool and ventilated place.

Check the wear condition of product surface regularly, and make corresponding maintenance and adjustment.

Avoid falling and collision, or it may lead to deformations.

Do not use hard metal products, cleaning cloth or chemicals to wipe the baking tray.

Do not store baked or about to bake food in the baking pan for a long time, otherwise it may cause the surface of the baking pan to be corroded, thereby affecting the service life of the baking pan;

The temperature of red coat is lower than 250 degrees, which can prolong the service life of aluminium baking pan.

More customization service in factory
