

Custom Handmade 400*600mm Reverse-folded Edge Commercial Industrial Aluminium Sheet Pan Bakery Tray Bread Cake Cookie Baking Sheet

Main features of handmade commercial aluminium sheet pan bakery tray

1. Our handmade baking tray is constructed using a high-quality aluminium alloy, which ensures its durability, sturdiness, and resistance to rust and corrosion. It is designed to last longer and perform better than traditional baking trays, providing excellent value for money.
2. Our baking trays are meticulously handmade by skilled craftsmen, who carefully oversee each step of the production process to ensure that each tray meets our stringent quality standards. This guarantees that every tray is unique, with its own personal touch, and has been made with care and attention to detail.
3. Our baking tray is 5cm deep, with a right angle and reverse-folded edge design. This makes it easier to handle and prevents food from sticking to the edges, resulting in beautifully baked products every time. The deep design also allows for a greater capacity, so you can bake more at once, saving time and effort.
4. Measuring 400*600mm, our baking tray is a standard size that is perfect for use in a variety of settings, including bakeries, food factories, commercial kitchens, and industrial environments. The size is ideal for baking a wide range of products, from bread and pastries to meats and vegetables.
5. As a professional ODM/OEM [aluminium sheet pan manufacturer](#), we are committed to providing our customers with the highest quality products and services. We work closely with our clients to understand their unique needs and requirements, and use this knowledge to create bespoke baking trays that meet their specifications. With years of experience in the industry, we have the expertise to deliver outstanding results every time.
