

# Machine Stamp Small Aluminum Cookie Baking Sheet Tray Bakery Sheet Pan

## Main features of aluminum cookies baking sheet bakery sheet pans

1. This aluminum sheet tray is made of high-qualified 1.0mm thickened aluminum alloy, which will never rust for long service life and makes bread/cake bake and brown evenly due to its superior heat conductivity.
2. It is made in one piece by machine stamp, with round smooth corners for easier cleanup. The 1.0mm thickness supports enough strength preventing warping during baking.
3. It is produced for multiple function, making brownies, baking large sheet cakes, cooking sheet pan dinners etc.
4. Non stick coated surface is optional for better durability and non-stick characteristics.
5. Easy for demoulding and cleanup. It is recommended to be washed by hand.
6. Tsingbuy [aluminum tray factory](#) makes it in small size to suit household ovens for baking. And customized size is welcomed. Custom manufacturing is one of our largest business and as well as our biggest strength.
