

Perforated Non-stick Bun Pan

Main features of perforated non-stick bun pan

1.0mm thick aluminum material, good heat conductivity and strong enough.

Perforated surface, excellent for air flow, faster for baking bread and heat release.

Teflon coated surface make it non-stick and easier for cleanup.

Curling edge and wire in rim for more perfect performance and no hurting hands.

Machine-stamped inner mould is smooth around edge, good performance to shape bread.

Tsingbuy is professional [non-stick bun pan supplier](#) with professional team, good service, in-time delivery and high-qualified products.
