

Perforated Round Multi-mould Tray

Main features of perforated round multi-mould tray

It is a customized tray. Aluminum, alusteel, stainless steel are optional as metal materials.

The inner moulds are integrated machine stamped and then machine buckled to to tray frame. It has better durability.

Perforated bottom for the inner round moulds allows better air circulation and quicker beking effect.

Tsingbuy [multi-mould bread pan factory](#) ecommends either teflon or silicone non-stick coating for aluminum/alusteel multi-mould tray. Easy for cleanup and release.
