Rows Metal Small Baguette Pan French Loaf Bread Baking Mold Tray

Main features of 3-row non stick perforated French loaf bread baking tray

1. Made of carbon steel or aluminum alloy material, integrated machine stamping process, which is firm, corrosion-resistant and durable.
2. The two sides of the mould are non-stick, saving oil and will not stick food to make bread look perfect. After use, it only needs to be wiped gently, which is easy to clean.
3. Coating is the most important part of the mold, because it direct contacts with food, related to the heating state and safety of food. Tsingbuy [French bread loaf pan manufacturer](#) uses high quality coating, food safety, certificated, easy demoulding, long service life, you can feel free to choose and use.
4. Exquisite workmanship, small and light, can be used in the home oven to enjoy the fun of home baking
