Length options: 60/90/120/150cm  
a plastic hook at the end of handle for easier storage.

Perforated metal rakes are commonly used in agriculture and landscaping for tasks such as soil aeration and weed control. The perforated heads allow for better airflow and drainage, making them ideal for use in wet or muddy conditions. The solid metal rakes, on the other hand, are typically used for general cleaning and maintenance tasks. The combination rakes offer a versatile design that can be used for a variety of applications. The rakes are made of high-quality metal, ensuring durability and long-lasting performance. The black handles provide a comfortable grip, while the silver handles offer a more professional appearance. The rakes are available in various sizes to suit different needs and preferences. For more information, please visit [www.perforatedmetal.com](#).
